DISCOVERS**

a world of  
research

## Magic of Milk

1. What protein gives milk it's whiteness?
2. Does the pH of milk go up or down to make yogurt?
3. How do you turn cream into butter?
4. What happens to milk in order to make cheese?

Now try it yourself! Turn a bottle of cream into your very own butter. The worst that can happen is that you can eat your experiment!
